EXPERIENCE:

Brett trained and worked as a mechanical engineer and design engineer with Fluor Daniel Engineering and Construction (Fluor Corp) in Chicago, IL. Through Fluor Daniel, Brett has significant experience in process design and construction, as well as construction management as a project engineer and construction manager.

Following Fluor Daniel, Brett joined in a partnership and worked as a consulting engineer and project manager. Brett has extensively traveled for projects throughout the United States, Canada, Mexico, South America, Africa and the Caribbean.

During Brett's consulting practice he developed an interest in investing and developing real estate projects. Brett obtained his real estate brokers license and has experience in developing project from conception, to finance, through construction, sales and management. Brett has experience in all aspects of residential, retail, industrial, commercial and investment real estate projects. Additionally, Brett manages all aspects of multimillion-dollar commercial properties that he has ownership interests in with other investors.
